

SolveCC is a hub for experiential learning through impact-driven projects that help students solve real-world challenges in their communities.

Future Ready

Inspire and empower promising innovators to collaborate and engage in impact-driven projects that build the skills, confidence, and connections to shape their future.

Our Vision

A world with engaged and connected communities where everyone realizes their full potential and feels a sense of belonging.

Why we do this

We believe that talent is everywhere, access to opportunity is not.

What we do

We create opportunities for learners to build their skills and entrepreneurial mindset by accessing our problem-solving platform.

How we do it

- Offer a collaborative experiential learning platform where students engage in solving real-world problems in a peer-to-peer process.
- Create community-based competitions to develop and promote solutions that solve local problems.
- Incentivize teams to research and identify local challenges and develop solutions to address them.
- Provide mentorship for teams from experts.
- Actively engage community stakeholders to support and help implement impactful solutions.

Partner with SolveCC

Advance student success through scalable experiential learning.

Partnership benefits

Empower Your Students

- Develop career-readiness through real world problem solving
- Boost learner confidence by building practical skills
- Exercise agency through self-directed impact
- Provide free access to transformative learning opportunities

Strengthen Your Institution

- Establish your reputation as as a leader in innovative experiential education
- Improve cross-departmental collaboration
- Spotlight your commitment to student agency
- Connect classwork with real world application
- Strengthen local entrepreneurial ecosystem
- Attract and retain learners looking for meaningful experiences
- Connect and share best practices with other changemaking institutions

Prepare Job-Ready Graduates

- Equip students with in-demand skills such as inquiry skills, curiosity, creativity, critical thinking, collaboration, networking
- Bridge the gap between education and employment
- Cultivate talent tailored to industry needs
- Develop professionals ready to lead and solve challenges
